Ra-02 V1.1

Module reference box

REFERENCE ONLY / No fit, manufacturing or flight acceptance

Nominal STEP wireframe - all edges shown

Views are independently fitted to the page, not to scale. No assembly placement is implied.

Reference case	X (mm)	Y (mm)	Z (mm)
height low	17.00	16.00	3.10
nominal	17.00	16.00	3.20
height high	17.00	16.00	3.30

XYZ follows the input registry. The box corner is not a sensor axis or board datum.

Limits of this reference

- Length / width tolerance: unknown.
- Connector, antenna, cable and mounting clearance: unknown.
- Thickness cases alone are not complete worst-case fit envelopes.

MPU-9250

Chip package reference box

REFERENCE ONLY / No fit, manufacturing or flight acceptance

Nominal STEP wireframe - all edges shown

Views are independently fitted to the page, not to scale. No assembly placement is implied.

Reference case	X (mm)	Y (mm)	Z (mm)
minimum	2.90	2.90	0.95
nominal	3.00	3.00	1.00
maximum	3.10	3.10	1.05

XYZ follows the input registry. The box corner is not a sensor axis or board datum.

Limits of this reference

- Not the GY-91 PCB or its installed height.
- Pad seating height is not added to total package thickness.
- No pads, pin-1 mark, board placement or sensor axes are modeled.

BMP280

Chip package reference box

REFERENCE ONLY / No fit, manufacturing or flight acceptance

Nominal STEP wireframe - all edges shown

Views are independently fitted to the page, not to scale. No assembly placement is implied.

Reference case	X (mm)	Y (mm)	Z (mm)
minimum	1.90	2.40	0.90
nominal	2.00	2.50	0.95
maximum	2.10	2.60	1.00

XYZ follows the input registry. The box corner is not a sensor axis or board datum.

Limits of this reference

- Not the GY-91 PCB or a pressure-sensor housing.
- Explicit XY +/-0.10 mm overrides the general +/-0.05 mm note.
- No vent path, lid details, solder stack or installation clearance.
